### Bushcraft and Bows (ages 8+)

- Children arrive at the woods and after an initial safety brief they gather the resources and tools needed to finely craft a bow and some arrows. Once their archery set is complete they will head over to the targets and engage in a game of target archery with the last person standing being crowned the winner.
- Once the game has been completed the children will have break for lunch and birthday cake before going on a journey to the top of the woods. Here they will play a few games before toasting marshmallows over the main campfire and adding chocolate biscuits to make s'mores.
- Children will then collect up the bow and arrow sets they crafted and then head to the transport to make their way back home.
